Library, Division of Reference

Washington 25, D. C.

Gentlemen:

We are happy to enclose our first list from our new nursery. You will notice that we are able to offer only small sizes in a limited number of varieties for fall and spring. However, more varieties and larger grades will be available for fall of '63 and spring of '64.

Our nursery here at Newark consists of 565 acres of rich Little Kanawha River bottom land and is producing excellent plants. This site is many miles from any industrial or chemical manufacturing area and free from air pollution or contamination.

We want to make it clear that the nursery stock of the old company, Conner & Amos, Inc., at Winfield (some 75 miles away) which was contaminated by 245T, in 1960, is not in any way involved in this offering. The list covers only plants grown at this new nursery and free from contamination.

Our hope is to once again provide you with top quality plants. You are most cordially invited to visit the nursery and inspect our blocks of growing stock.

Very truly yours,

CONNER & AMOS NURSERY CO.

By Carl Conner
Partner.
